Short answer: Dallas–Fort Worth has one of the densest clusters of recovery studios in the US, spread from Lower Greenville and Preston Hollow to Southlake, Frisco, McKinney and Fort Worth. Most are chains; what differs is supervision, screening and honesty of claims. If you have a medical condition or take prescription medicines, talk to your own doctor before you book. This guide is education only. It is not medical advice, and no business listed here has paid for placement. For the wider city picture, see our [Dallas hub](/us/dallas).

Why the Metroplex is different

DFW is a driving metro, and franchise menus bundle cryotherapy, red light, compression and sauna into memberships. That makes it easy to buy more sessions than a goal needs. Pick one goal and one service, and trial it for four to six weeks before you sign up.

Float tanks

What the evidence says. Floating in warm, salt-saturated water with reduced light and sound has been studied in small trials for short-term stress and anxiety. One trial reported short-term reductions in anxiety after a single session ([Feinstein et al., PLOS ONE, 2018](https://pubmed.ncbi.nlm.nih.gov/29394251/)). That is early evidence about how people feel afterwards, not proof of lasting health effects. **What to ask.** How is the water filtered between clients? Can you leave the light on or the door ajar? Do they advise against floating with open cuts, a fresh tattoo or uncontrolled epilepsy? **Dallas options (float):** - [Pause Studio — Park Cities](https://pausestudio.com/locations/park-cities): float alongside cryotherapy, red light and sauna/cold plunge (also lists IV; see note below). - [Pause Studio — Southlake](https://pausestudio.com/locations/southlake): float, cryotherapy, red light and sauna/cold plunge (also lists IV).

Sauna, cold plunge and red light

What the evidence says. The best-known sauna data come from a Finnish observational study of 2,315 middle-aged men: more frequent traditional sauna use was associated with fewer fatal cardiovascular events and lower all-cause mortality ([Laukkanen et al., JAMA Internal Medicine, 2015](https://pubmed.ncbi.nlm.nih.gov/25705824/)). That is an association in one population, not proof of cause, and infrared cabins run cooler and are studied less. Cold-water immersion has some evidence for less post-exercise soreness, rated low quality by a Cochrane review ([Bleakley et al., 2012](https://pubmed.ncbi.nlm.nih.gov/22336838/)). Red light has been studied mainly for skin and wound

outcomes, with variable quality ([Avci et al., 2013](https://pubmed.ncbi.nlm.nih.gov/24049929/)), so treat fat-loss or longevity claims with caution. **Texas heat matters here.** Dallas summers are long and hot, and heat plus some common medicines (for blood pressure, mood, allergies and more) changes how the body copes. CDC advises clinicians that many medicines affect heat tolerance ([CDC heat and medications guidance](https://www.cdc.gov/heat-health/hcp/clinical-guidance/heat-and-medications-guidance-for-clinicians.html)). A sauna session after a 100°F afternoon is a bigger load than the same session in January. Keep sessions short. **What to ask.** Temperature and time limits? Staff on the floor? Grab rails into the plunge? Screening for heart conditions, blood pressure, pregnancy, medicines and alcohol? **Dallas options (sauna / cold plunge / red light):** - [Sweathouz — Dallas West Village](https://sweathouz.com/westvillage-book-now/): infrared sauna, cold plunge and red light. - [Sweathouz — Dallas Preston Royal](https://sweathouz.com/prestonroyal-book-now/): infrared sauna, cold plunge and red light. - [Sweathouz — Plano](https://sweathouz.com/plano-book-now/): infrared sauna, cold plunge and red light. - [Sweathouz — Fort Worth Camp Bowie](https://sweathouz.com/camp-bowie-book-now/): infrared sauna, cold plunge and red light. - [Perspire Sauna Studio — Fort Worth](https://www.perspiresaunastudio.com/locations/fw-waterside): private infrared sauna suites with red light. - [Perspire Sauna Studio — Southlake](https://www.perspiresaunastudio.com/locations/southlake): private infrared sauna suites with red light.

Whole-body cryotherapy

What the evidence says. FDA has said it has not cleared or approved any whole-body cryotherapy device for medical treatment, and has listed risks including oxygen deficiency when liquid nitrogen is used, frostbite, burns and eye injury ([FDA consumer update, archived](https://web.archive.org/web/20240213033124/https://www.fda.gov/consumers/consumer-updates/whole-body-cry **What to ask.** Nitrogen-cooled or electric? Is your head outside the chamber? Is an attendant present the whole time? What is the maximum session length? **Dallas options (cryotherapy / recovery):** - [Degree Wellness — Lower Greenville](https://degreewellness.com/locations/lower-greenville-tx/): cryotherapy, red light, infrared sauna/cold plunge and compression. - [Degree Wellness — Richardson Cityline](https://degreewellness.com/locations/richardson-cityline-tx/): cryotherapy, red light, sauna/cold plunge and compression. - [iCRYO — Dallas Preston Hollow](https://icryo.com/location/dallas-tx-preston-hollow/): cryotherapy. - [iCRYO — Fort Worth West 7th](https://icryo.com/location/fort-worth-tx-west-7th/): cryotherapy. - [Icebox Cryotherapy — Frisco](https://iceboxtherapy.com/frisco-tx/): cryotherapy, red light and compression.

A note on IV menus

Some chains above also list IV drips on their menus. An IV is a medical procedure, not a wellness add-on. We list these businesses for their other services and do not recommend IV therapy. Healthy people usually meet hydration needs by drinking, and anyone with a heart or kidney condition should ask their own doctor before any infusion.

DEXA, VO2 and strength

What they measure. A DEXA scan uses low-dose X-ray to estimate fat, lean mass and bone, so book one when the result will change what you do ([FDA, medical X-ray imaging](https://www.fda.gov/radiation-emitting-products/medical-imaging/medical-x-ray-imaging)). VO2 max testing measures cardiorespiratory fitness; in observational data, higher fitness is associated with lower long-term mortality ([Mandsager et al., JAMA Network Open, 2018](https://pubmed.ncbi.nlm.nih.gov/30646252/)). A meta-analysis of cohort studies found muscle-strengthening activity associated with lower all-cause mortality ([Momma et al., BJSM,

2022](https://pubmed.ncbi.nlm.nih.gov/35228201/)). For most adults, a strength programme is a better first spend than a gadget. **Dallas options (DEXA / diagnostics):** - [BodySpec — Dallas](https://www.bodyspec.com/booking?region=dallas): DEXA body composition. - [DexaFit — Dallas](https://www.dexafit.com/locations/texas/dallas): DEXA and fitness testing including VO2.

A five-question checklist for any Dallas studio

1. **Purpose:** Is this a medical treatment or a wellness session, and what is it meant to do for me? 2. **Supervision:** Who is on site, and what are their credentials? 3. **Screening:** What health and medicine questions do you ask before the first session? 4. **Evidence:** Can you point me to the study or FDA clearance behind this claim? 5. **Exit:** What happens if I feel unwell, and when should I see my own doctor? If a provider promises to cure a disease, reverse ageing or replace your medical care, treat it as a red flag. FDA's [health fraud page](https://www.fda.gov/consumers/health-fraud-scams) explains how to spot these claims.

Where coaches fit

A good health coach helps you decide whether a service fits your goals and budget, then keeps you consistent with sleep, walking, strength training and food quality. Coaches educate and refer. They do not diagnose, prescribe or sell medical treatments.

Want to coach this? LetsGo Academy

Start free with [Level 1](/academy). [Level 3 (US$300)](/academy/level-3/evidence-quality-for-coaches) teaches evidence quality, GLP-1 and peptide foundations. Level 4 (US$500) covers working alongside prescribers and US regulatory status. Level 5 (US$500) covers jurisdiction and grey-market case studies. Already coaching? Create your profile at /coach. We do not promise income or client results.

Are you a Dallas provider?

Run a sauna, float, red light, cryotherapy or diagnostics business in Dallas, Fort Worth, Plano, Frisco or Southlake? You can ask to be listed in the letsgo.health directory. Enquire: support@resohealth.life *Listings are drawn from businesses' public websites and checked on 4 Nov 2026 against the Dallas directory CSV. Inclusion is not an endorsement. Prices, services and supervision change, so confirm with the provider directly.*

Safety note

Education only. Coaches educate and refer; they never prescribe, dose, source or sell medicines.
